

What began as a high school project for his son motivated C. M. Fore to create a business in 1967 and evolved into a premier manufacturer of motorhomes based in Nacogdoches, Texas. Mr. Fore embarked on a personal mission to bring innovation, quality, specialization and customization to a budding recreational vehicle market. His ideas for innovation included letting individuals take the comforts of their home with them as they traveled, designing and building his own unique chassis, and introducing the revolutionary diesel pusher.

Foretravel has long provided unsurpassed ride & handling and unexcelled fit & finish. The ride and handling begins with its own engineered Travelride™ chassis and ends with the fit & finish of its handcrafted natural wood or laminate cabinetry and mastercrafted exterior paint and graphics. Mr. Fore's vision of creating a culture of innovation has served Foretravel since 1967. That same innovation can also be found throughout the motorcoach, including the electrical systems, air-bladder sealed slide-rooms, and parallel utility bay doors. And, the same emphasis on quality has long applied to durability, longevity and safety of its vehicles.

For almost five decades Foretravel has taken specialization and customization far beyond the industry standard. Our custom process often begins with a blank sheet of paper and takes final shape when the customer's ideas mesh with the experience of our design team. The signature coach of your dreams awaits you at Foretravel.
